

What do you want to do after graduation?

Automotive Technology

Keep any vehicle road-worthy by learning about engines and the basics of fuel, brakes, steering and suspension and the electrical systems/electronics that power today's cars. You will learn to troubleshoot, diagnose, maintain and repair a wide range of vehicles using the latest technology. This program is an Automotive Service Excellence (ASE) Education Foundation certified.

Automotive Technology Careers:

- New Car Dealerships
- Independent Repair Facilities
- Specialized Automotive Repair
- Automotive Parts Stores
- Auto Centers
- Quick Lube/Preventative Maintenance Service

Collision Repair Technology

Like working with cars, trucks or bikes? Would you like to be able to modify, repair or customize your vehicles? You can have a successful career in the Collision Repair Industry! Learn all the entry-level skills you need at Pioneer to get started. This program is an Automotive Service Excellence (ASE) Education Foundation certified.

Collision Repair Technology Careers

- Independent Body Repair Garages
- New Car & Truck Dealerships
- Windshield & Glass Installer
- Auto Parts & Paint Stores
- Manufacturer Painter & Welder
- Entrepreneurship

Industrial Diesel

The nation's economy hums along the interstate highways on 18 wheels. Farm equipment is powered by diesel engines as well. Trained diesel mechanics are in big demand. In this program you will focus on diesel engine work and heavy truck maintenance and repair. This program is an Automotive Service Excellence (ASE) Education Foundation certified.

Industrial Diesel Careers:

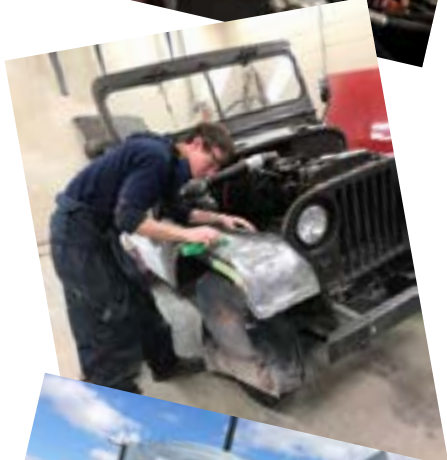

- New Equipment Dealerships
- Truck Stop/Emergency Road Technician
- Parts Department Salesperson
- Truck Rental
- Truck Driver
- Agricultural Equipment Technician
- Repair Technician
- Service Department Manager
- Engine Diagnostic Technician
- Transit Technician

Power Equipment Mechanics

On or off the road recreational vehicles like motorcycles, dirt bikes and ATVs create a growing demand for individuals trained to service them. Add lawn and garden equipment and agricultural and farm equipment and the demand is very high. Learn the basic principles of maintenance, repair, fabrication/welding and operation of small internal combustion engines for lawn and garden equipment, agricultural and farm equipment, chain saws and recreational vehicles.

Power Equipment Mechanics Careers

- Power Equipment Repair Shop Mechanic
- Recreational Vehicle Sales & Repair
- Lawn & Garden Tractor Sales & Repair
- Agricultural & Farm Equipment Sales & Repair
- Shop Parts & Service Representative
- Factories Producing Engines & Other Equipment
- Company Vehicle Maintenance
